

Elevator Pitch – Jesus Chavez by Renee Apelo

Am currently in Mission College, Majoring in graphic design. I had experience in collaboration with teams on projects. I volunteered in Silicon Valley second harvest, I had the opportunity to design a 25th anniversary logo for a school, which help me develop in my communication skills, time management and working as a team. I'm efficient in adobe software, like photoshop, illustration and indesign. I love editing photos and videos, I keep myself what is treading in social media, in design. I'm seeking out internship that I can apply my skills and experience in a professional setting and continue growing as a designer and take my my skills to the next level.

Your efficiency in Adobe software, like Photoshop, Illustrator, and InDesign is good knowledge and skills. Your passion for editing photos and videos is also a plus. Your experience in collaboration with teams in the past helped you to be more confident in communicating and working with your team members and you have learned how to manage your time wisely.

I hope you can find an internship so you can learn more knowledge skills and experience for your professional growth someday.
